

## **Ferragon Corp selected as Toll Processor of the Year finalist in the 2021 AMM Awards for Steel Excellence.**

(Cleveland, Ohio) Ferragon Corp is pleased and honored to announce that it has been selected as a finalist for the 2021 AMM Awards for Steel Excellence in the category of Toll Processor of the Year. The nomination includes Ferragon and its eight divisions: Ferrous Metal Processing, HyCAL Corp., Ferrolux, Autolum, FerrouSouth, Ferrous85, Ferrous Metal Transfer and FMP Met Lab.

Ferragon Corporation had its genesis in 1983 with the purchase of a batch pickling operation, a slitting line and a cut-to-length line, starting at Ferrous Metal Processing in Cleveland, OH with 8 employees.

Today, with over 200 employees and processing more than 1.2 million annual tons, Ferragon Corporation is the premier flat rolled toll processor in the USA. Offering pickling, slitting, CTL, stretcher leveling, UM leveling, cold rolling, batch annealing, continuous annealing and trucking through our eight divisions, Ferragon supports manufacturing supply chains in industries such as automotive and transportation, energy, appliance, construction, agriculture, mining, metal building, and general fabrication across the Midwest and Southern USA.

The divisions of Ferragon are leaders in the geographic markets they serve, and Ferragon Corp. is the only steel processing company that can leverage the capabilities of our divisions to convert hot rolled coils all the way to fully processed AHSS/UHSS steel coils delivered to its customers.
